

## *Anxiety & Depression Relief Formula™*

**Experience a new and proven cell-signaling approach to promptly, effectively and safely enhance one's energy, sense of well-being and positive outlook on life.**

Cell signaling is the language of hormones, growth & neurotrophic factors, cytokines and other cell-signaling proteins which the body uses to instruct cells how to function. Feeling anxious or depressed indicates altered cell-signaling pathways which in part control how we feel. Our formula utilizes the cell signaling factors needed to stimulate an increase in feeling in control, desire to plan and do things, and energize a better sense of well-being that demonstrates a return to healthy balanced cell-signaling homeostasis.

**Anxiety & Depression Relief Formula** is a proprietary formula of BDNF and leptin-based cell signaling factors uniquely designed to directly reduce symptoms arising from imbalances in both of the anxiety and depression-related signaling pathways.

The goal of our unique **Anxiety & Depression Relief Formula** is to reduce anxiety and feeling stressed in both personal and in social settings by promoting balanced restoration of healthy neuronal signaling pathways which control these feelings.

### **Benefits of Anxiety & Depression Relief Formula**

- Feel good about yourself, life and living
- Anti-anxiety signaling to reduce effects of stress
- Enhance sense of self and well-being
- Increase energy and improved sleep
- Instill a renewed sense of optimism and well-being
- Safe for youth, elderly and medication sensitive persons – begin 1x/day
- Caffeine and stimulant free
- Non-prescription, as a convenient under-the-tongue spray

### **Reports from initial case study reports using *Anxiety & Depression Relief Formula***

More positive outlook on day-to-day activities  
Decreased sense of feeling alone & isolated  
Greater sense of well-being and self-control  
More willing to plan and just do things

Less anxiety  
Greater energy  
Improved sleep  
Feeling motivated

**Neuroendocrine Researcher and Formulator's Note:** *"This formula is designed to address the anxiety and depressive pathways, which are different but are often simultaneously out of signaling balance. Please note that a healthy diet and exercise is crucial for overall health and this includes how we feel and function. For greater effectiveness take it regularly for the first month and note the changes which you see on the self-assessment form which is available.*

- Note**
- \* *Anxiety & Depression Relief Formula* itself does not create adverse side effects. However, if you are taking anti-depressant or anti-anxiety drugs, be aware of their published adverse side effects which may manifest indicating you might be taking a dose exceeding that which is needed.
  - \* This formula is designed to complement and enhance all therapy protocols.
  - \* The ingredients in our formula are derived from recombinant DNA human polypeptides - 'recombinant DNA' is the only process for producing in a lab the identical cell signaling molecules which the body produces.
  - \* There are no botanicals, extracts, minerals, drugs, or other ingredients.
  - \* Our medicines are non-prescription and are not pharmaceutical drugs.
